KEYMACRO allows you to generate virtual LANs that allow your Linksys EA2700 Free Download router and your computers to be connected as if they were in the same physical LAN. This makes it easy to have computers connected to a single router but appear to be on separate networks. All the computers have to be configured to use the same virtual LAN. How KEYMACRO works: KEYMACRO allows you to choose one of three algorithms for generating a virtual LAN. You can choose how many computers

should be in the same virtual LAN. You can also choose how many ports should be used for connecting to other computers. When you choose a virtual LAN, you can choose which users should be able to access which computers. The Connectivity algorithm lets you choose the algorithm used for connecting to other computers. The performance algorithm lets you choose the CPU cycles used for generating the virtual LAN. The port algorithm lets you choose the number of ports available for connecting to other computers. Each algorithm has a speed profile. This speed profile is used to generate a virtual LAN. The higher the speed, the more computers can be connected to one computer. When you connect to a computer using KEYMACRO, the computer will show an icon in the system tray. If you press this icon, the computer will ask you which algorithms you want to use. Features: Supports any number of computers Supports any number of virtual LANs Supports different numbers of connections to other computers Supports all three algorithms of KeyMACRO Supports the port algorithm to give you a maximum number of computers Supports the performance algorithm to give you the maximum number of computers Supports all profiles of the algorithms Compatible with the latest Windows operating system Supports VLANs (Virtual LANs) Supports wireless computers Supports all Windows OS Supports all MAC OS Supports all major browsers Supports any size of computer screen Supports multiple display options Supports Auto-updates Supports all types of web browsers Supports saving up to a maximum of 256 items Supports single item or multiple items Supports saving the favorites Supports multiple copies of the favorite Supports

passwords Supports multiple passkeys Supports multiple computers with different passkeys Supports deleting a single item or multiple items Supports a maximum of a few gigabytes of data Supports a maximum of 256 items (that can be deleted) Supports a maximum 77a5ca646e
