A different approach for improving the program's overall functionality and easy access to several features are welcomed. About Universal-Design The new concept of Universal-design is to allow a single user interface for all types of devices, and make the device usable irrespective of the user interface. It is a type of interface where the information is presented in an easy-to-understand format, and the user doesn't require extra training and practice. The ideal goal is to make it so the user doesn't need to learn anything specific on the user interface, and to allow him or her to take full advantage of the device. Are you ready for your Windows 10 upgrade? Microsoft will start notifying users about the upgrade on August 21, and the timeframe for completing the upgrade will vary from one machine to another depending on the OS version, device architecture, and hardware.
